

sentry+

Whatever way you want to view it.

The Sentry video door phone mirrors Urmet's technological expertise in offering versatile application solutions combined with clean design style.

The Sentry features a 4.5" CRT, offering a wide range of installation possibilities with its two versions (direct or reflex viewing).

In the direct viewing version, the monitor can be semi-embedded wall-mounted using a specific box, or installed on a tabletop using the specific optional tabletop conversion kit.

The reflex version, with reflected viewing of the image, can be installed against a wall or on a tabletop using the optional kit.

sentry+ mod. 1704

A video door phone that enjoys being versatile.

With Sentry, connection to system conductors is both fast and easy using the specific brackets equipped with the terminals required. Both versions feature a door opener key and two service keys for intercom or auxiliary services (switching on of the stair lights, opening of an extra door lock, etc.).

The versions whose code includes the letter A are compatible with the digital brackets for DIGIVOICE and BIBUS.

Volume and contrast adjustment

Standard door opener key and two service keys.

VIDEO DOOR PHONE

- ▲■X **Ref. 1704/1A** Monitor with door lock release key and two service keys, direct vision version
White ABS case. Dimensions (L x H x D): 200 x 232 x 89 mm for surface mounting and 62 mm for semi-flush mounting.
