

LCD MONITOR

NESS TFT LCD MONITOR

EN220 5.6" COLOUR LCD MONITOR

The ultimate portable or "executive" monitor with a very high contrast active matrix LCD display and audio input.

The screen is the latest generation high contrast, high luminosity active matrix LCD with a very wide viewing angle. Stereo audio inputs are provided, as well as a stereo earphone output and onboard speaker.

This monitor is suitable for:

Desktop surveillance monitor.

The small footprint and attractive finish makes this monitor ideal for use as a desktop monitor. The bright and flicker free active matrix LCD display is easy on the eyes and has a wide viewing angle.

Portable set up monitor for CCTV technicians.

The EN220 is the perfect portable accessory for CCTV technicians when setting up cameras. With a 12V battery and patch lead, you can adjust cameras quickly and easily right at the camera.

Rear view monitor for vehicles.

The EN220 has a switch for reversing the picture which makes it ideal for use in vehicles as a rear view / reversing monitor. Power input is 12VDC and the solid state LCD screen is sturdy enough to withstand the bumps and vibration of vehicle mounting.

Supplied in a nylon carry case with carry strap. Power and video leads and adapters included.
